

EXCITING RACING GUARANTEED!

With large grids, carefully controlled technical regulations, two classes and bigger events than any other championship of a similar status, the Milltek Sport Civic Cup provides some of the most exciting racing in the UK. Ask anyone involved and they'll tell you that it's the friendliest, most competitive and value-for-money motorsport you can find.

With 2021 being one of the best seasons yet, championship organisers will build on the achievements in 2022 to offer competitors a calendar of 16 rounds at seven meetings that features two triple and five double-headers at many of the UK's leading circuits. Adding to the campaign will be high levels of PR and public exposure, TV coverage and spectator attendance figures that surpass those of any other club-level racing.

Enquires suggest that entries will be oversubscribed in 2022.
Don't miss out. Register your interest today!

THE CLASSES

The Milltek Sport Civic Cup comprises two classes: The Cup Class, for EP3, FN2 and FK models manufactured between 2001 and 2011 with a limited number of modifications permitted and the Production Class, for EP3 and FN2 Type-R models manufactured between 2001 and 2005.

In all cases, cars must be fitted with Honda's 2-litre K-Series engine and retain many of the standard OE components. Only controlled performance parts may be fitted. Consequently, costs are kept to a minimum and competition remains close throughout the season.

WHAT'S IN STORE FOR 2022...

Cars

- Strictly controlled components and technical regulations ensure competitive - and fair - racing
- Two classes - Cup and Production
- Low running costs
- Cars available to hire from established teams
